

# REPRESENTATION OF GEOGRAPHICAL FEATURES

Master Revision Deck:  
Exact Answers, Mnemonics  
& Study Hacks

CONTAINS ALL CHAPTER  
EXERCISES & EXACT  
SOURCE QUOTATIONS  
FOR PERFECT RECALL.

Q1b, Q2a, Q3d

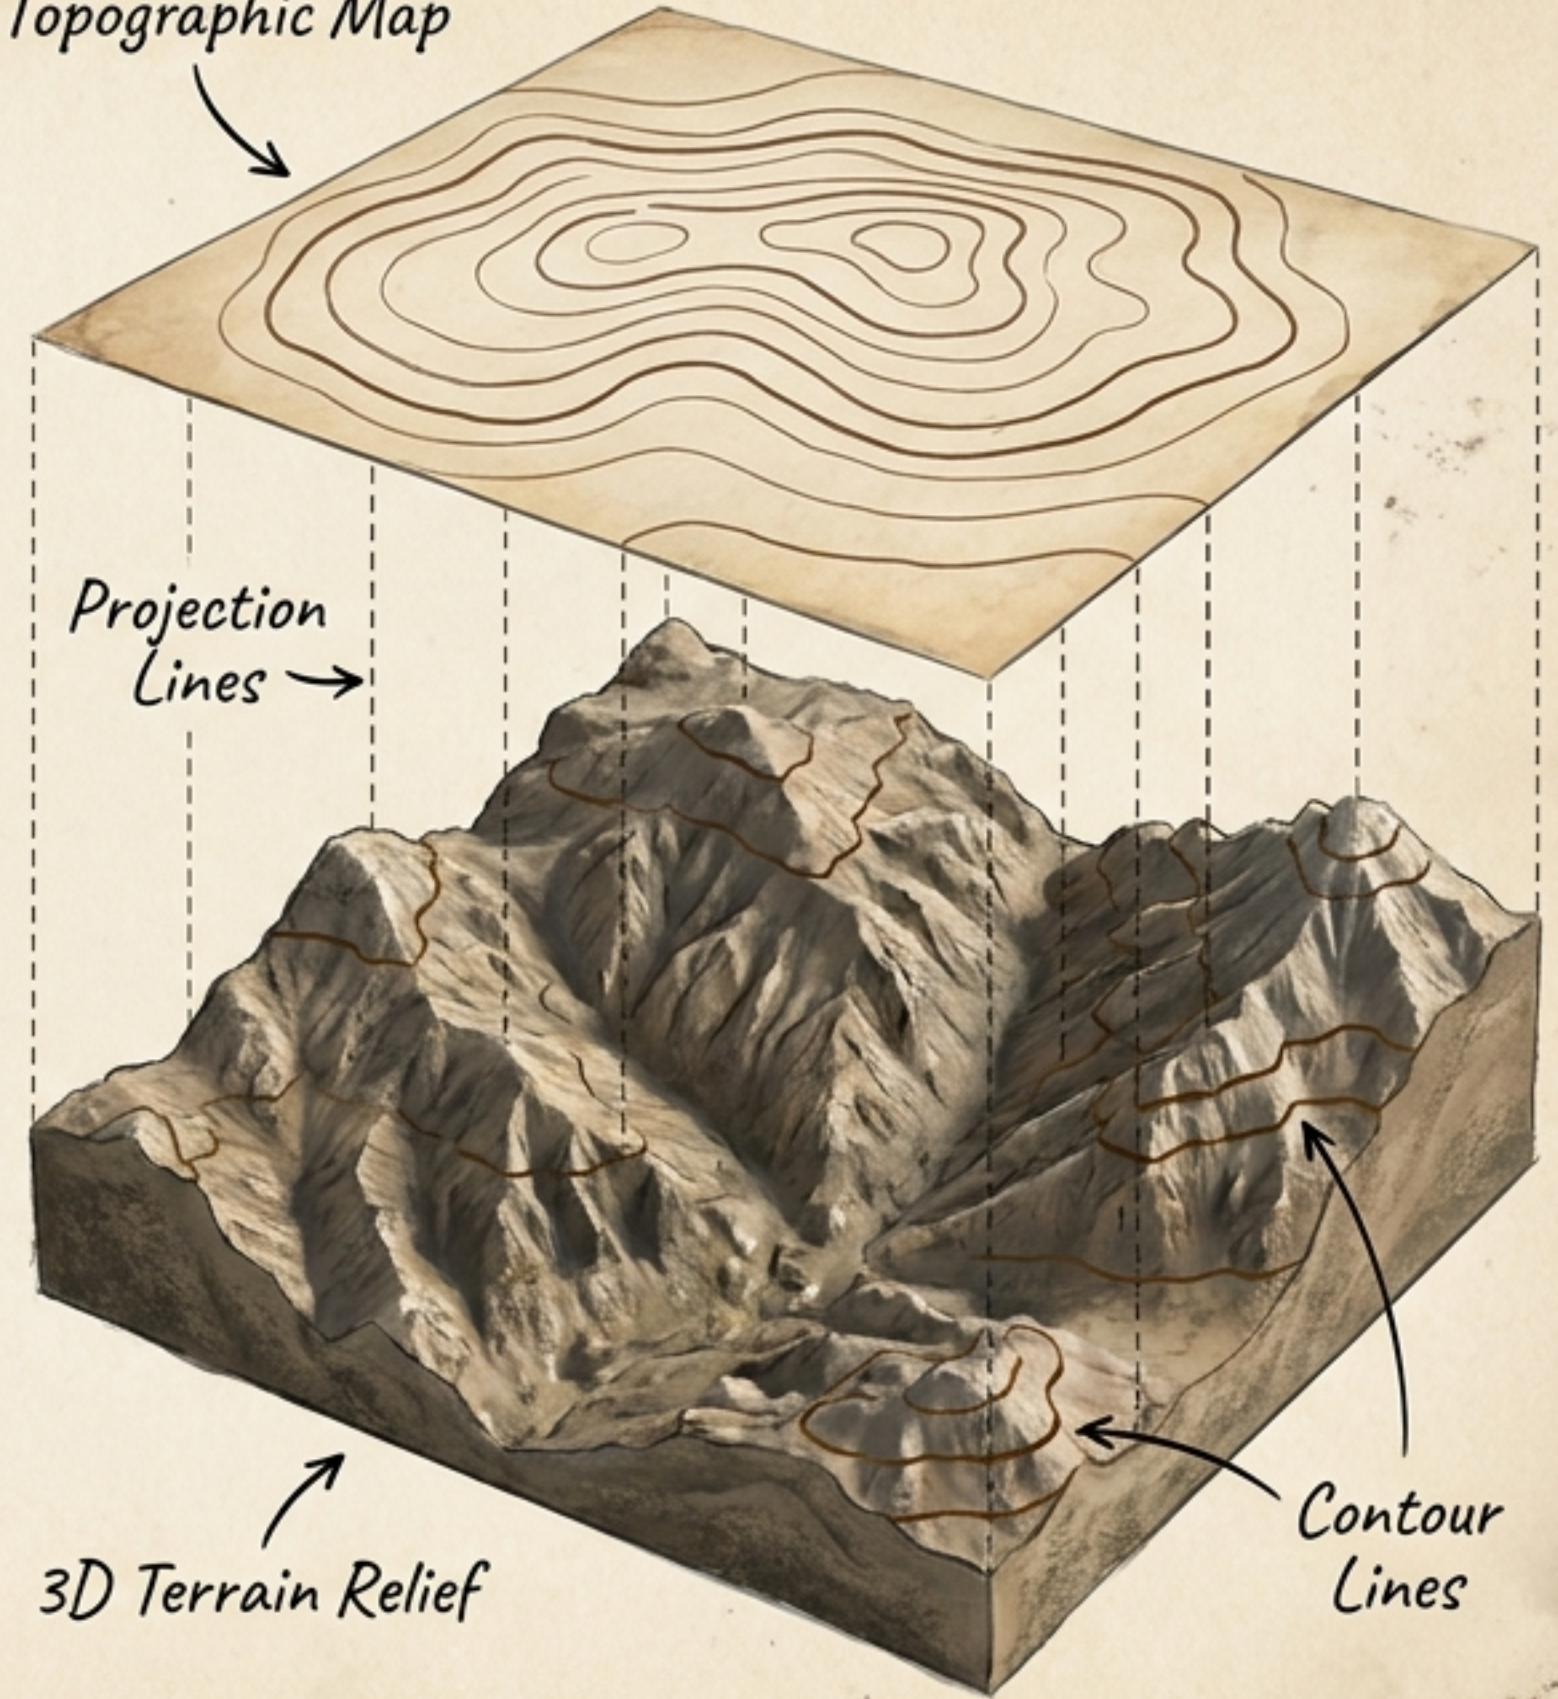

In modern mapping, a topographic map or a topographical sheet is a type of map characterised by large-scale detail and quantitative representation of relief, usually using contour lines; topographic maps show both natural and man-made features also.

### MEMORY HACK

L.Q.R. -> Large-scale  
detail, Quantitative  
representation,  
Relief.

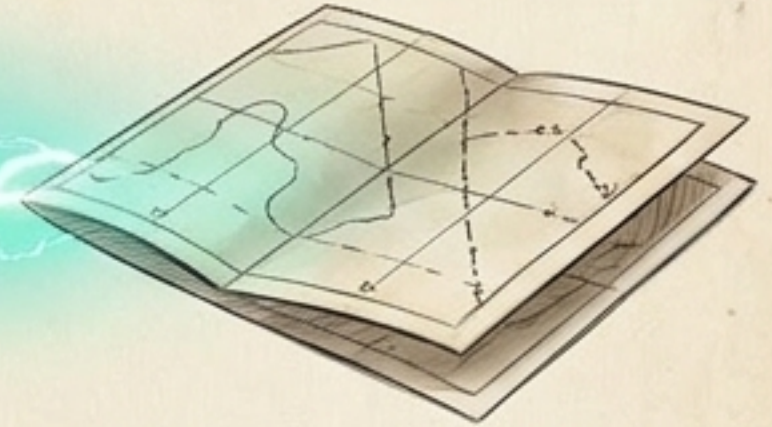

2D Topographic Map

Q1c, Q1d

Shrink Ray

Scale is defined as the ratio of the distance between two points on the map and the corresponding distance on the ground.

Thus, the scale helps us to reduce the size of the earth and represent it as a whole or in part on a piece of paper.

### FORMULA HACK

M.O.G. -> Map Over Ground.  
Scale lets you fold the whole earth onto a piece of paper — put the world in your pocket!

Q1e

"The scale used on the map is of three types: the Statement Scale, the Representative Fraction (RF) Scale and the Linear or the Graphic Scale."

Statement Scale

$$\frac{1}{x}$$

Representative  
Fraction (RF)

Linear Scale

*MNEMONIC PHRASE: Smart Readers Learn → Statement, Representative (RF), Linear.*

Q1f, Q2d, Q3a

1:50,000 ~~cm~~ ~~km~~

“The Representative Fraction or RF is the ratio between the distance on the map taken as unity and the corresponding distance on the ground.”

“Beings ratio the RF has no units.”

### WORDPLAY HACK

R.F. = Ratio Free (Free of units!).

Unity = 1

Exam Tip: Memorize the exact book spelling 'Beings ratio' to get full marks!

Q1h, Q5c (Part 1)

Point X

Point Y

“It is measured as the crowfly by overlooking or avoiding the physical barriers. ... This is the distance in a Straight Line.”

ALLITERATION HACK

Crowfly = Clear & Straight.

Exam Tip: Remember the exact book spelling 'barries' (barriers)!

Q1g, Q5c (Part 2)

“This distance is measured along the road, railway line or river, etc. To measure this distance a piece of paper or thread is used. A thread or twine is twisted on the curves between the points taken for measurements. Then the distance is measured on the linear scale by stretching the thread or twine along the scale.”

ACTION SEQUENCE HACK

Remember the 3 T's:  
Thread → Twist (on curves)  
→ Tension (stretch on scale).

Q1i, Q3e (Part 1)

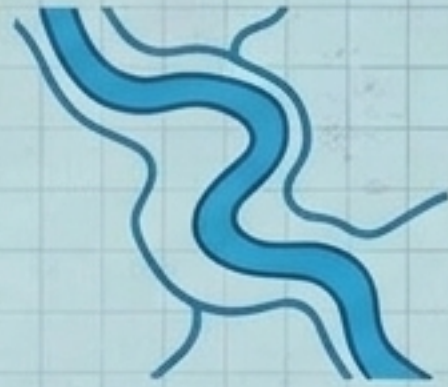

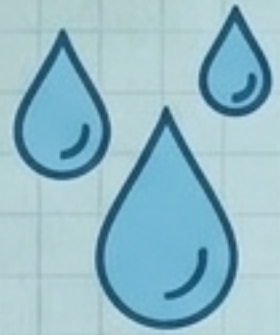

“Many colours are used on a topo sheet to represent certain physical, economic or cultural features.”

“The green colour is used for showing forested areas, trees, scrubs, orchards, etc. The cultivated areas are highlighted in yellow.”

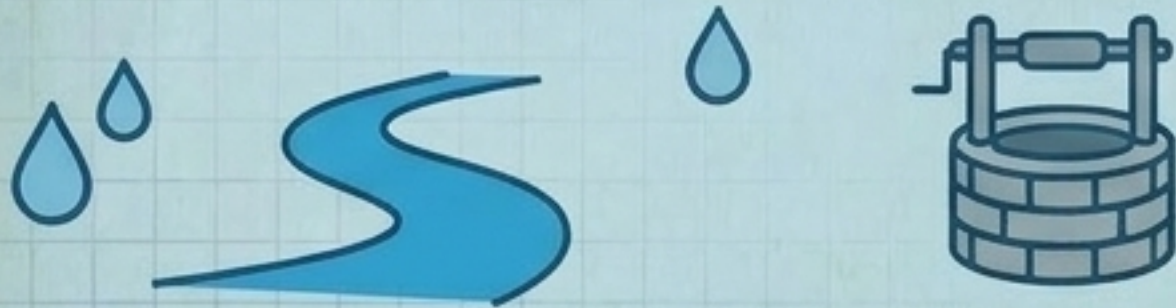

### VISUAL ASSOCIATION

Green: Picture an orchard of green apple trees.

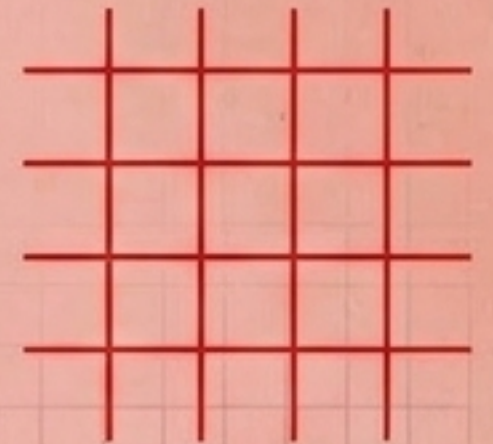

Yellow: Picture golden, cultivated fields of wheat under the sun.

“The blue colour is use to show all physical features associated with water such as seas, rivers, ponds, wells, etc.”

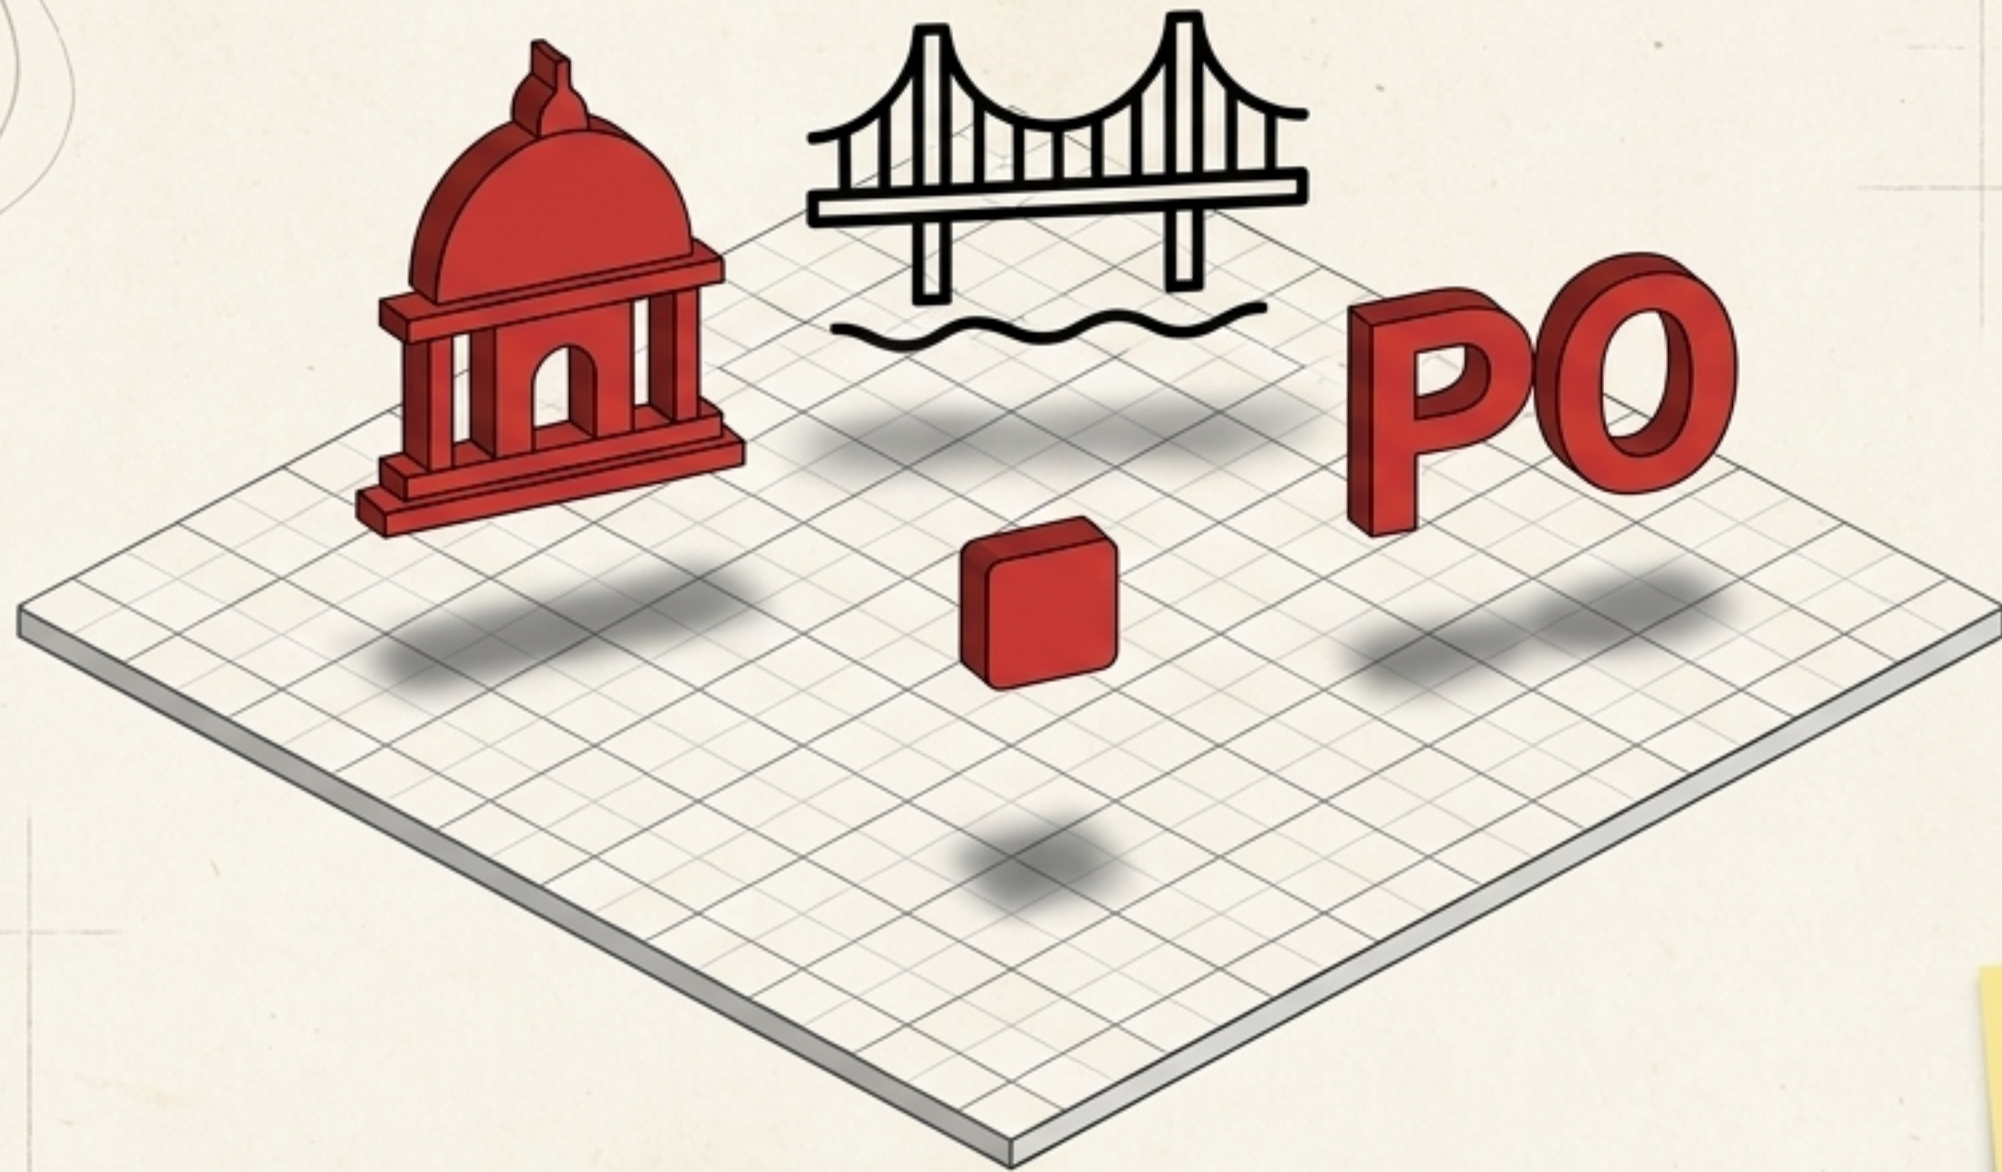

“The red colour is used for settlements, roads, and arbitrary gridlines, that is eastings and northings.”

MNEMONIC PHRASE: Blue Water, Red Settlements.  
(Exam Tip: Use exact phrase 'is use to show' for Blue!)

Q1j, Q2c, Q3g

"These symbols are useful as they facilitate the representation of meaningful information on topographical sheets."

### KEYWORD LINK

Symbols = M.I. (Meaningful Information).

Without them, a topo sheet is just empty squiggles!

Q4b

Boundaries

— . — . — . —

- . - . - . - . -

Railway

Roads

- - - - -

=====

VISUAL TRIGGERS: Metalled = Solid/Hard. Unmetalled/Cart = Dashed/Broken.  
International = Thicker/Bolder than State.

# Quick-Recall Master Cheat Sheet

| Scale Ratio                                                                                          | RF Units                                     |
|------------------------------------------------------------------------------------------------------|----------------------------------------------|
| ...ratio of the distance between two points on the map and the corresponding distance on the ground. | Beings ratio the RF has no units.            |
| Crowflight Distance                                                                                  | Map Symbols                                  |
| ...avoiding the physical barriers... Straight Line.                                                  | ...representation of meaningful information. |

You are now ready. Trust your memory, and remember your hacks!
